The Original Multidirectional Forklift

Designed to improve your workflow by effectively becoming three forklifts in one, a sideloader, counterbalance and narrow aisle forklift. This revolutionary design eliminates costly double handling of material and improves productivity enabling you to get more done in less time.

The Combi C-series has the ability to quickly change the direction of its wheels and move in any direction. This 4-way movement gives this forklift the versatility to transport long loads through narrow doorways and around objects with confidence and utmost safety.
