Pedestrian reach stacker with Combilift's patented multi position tiller arm

Equipped with our patented multi-position tiller arm the Combi-CS offers safer operation, maximum operator visibility and narrow aisle performance. The tiller can be turned to the left or right, allowing the operator to remain at the side, providing full visibility of the load and forks, while maintaining full steering control, enabling greater awareness of their surroundings which enhances overall safety. Standing to the side of the stacker eliminates the risk of being trapped or crushed while allowing the Combi-CS to operate in very narrow aisles.
