FOR HIRE OR SALE-PLEASE CALL FOR MORE DETAILS

Check out the performance of the 100 VJR for your aerial handling operations. Compact and easy to handle, this model consists of a vertical telescopic mast, an electric engine and a perforated basket meeting all your industrial requirements. The turret system rotates continuously at 360 degrees providing great flexibility to operators, and the machine compactness allows easy travel through a majority of industrial doors. The 100 VJR is ideal to work
